SUMMARY

AI-native finance and analytics professional with experience turning company, market, and operating data into investment research, financial analysis, and decision support. Combines fundamental research, valuation, econometrics, and quantitative analysis with AI-assisted analytical and coding workflows to test assumptions, accelerate analysis, and identify the drivers of performance, risk, value, and opportunity.

EDUCATION & HONORS

INDIANA UNIVERSITY BLOOMINGTON

May 2026

Bachelor of Science in Economics and Quantitative Methods (STEM); Minor in Psychology

Honors: Executive Dean's List, College of Arts & Sciences, 2024

Coursework: Machine Learning for Economic Data, Econometrics, Game Theory, Money & Banking, Statistical Analysis for Business & Economics, Computational Methods in Macroeconomics

Leadership: Finance Chair, Principles of Cybersecurity at Indiana University; managed ~\$2,000 semester budget and helped coordinate speaker events with EY for 60+ attendees

Certifications: Tableau Specialist · Excel Specialist (Global Career Accelerator)

LONDON SCHOOL OF ECONOMICS AND POLITICAL SCIENCE | London, UK

Jul 2024 - Aug 2024

Summer Study Abroad Program - Intermediate Macroeconomics; Introduction to Econometrics

SKILLS & TOOLS

Investment & Company Research · Financial Modeling · Valuation (DCF, Comparable Companies) · Excel · SQL/MySQL · Econometric & Statistical Analysis · Scenario & Sensitivity Analysis · Financial Statement Analysis · Python · Tableau (Certified) · R

PROFESSIONAL EXPERIENCE

THE GLOBAL TECH EXPERIENCE | Bloomington, IN

Jan 2025 - May 2025

Data Analytics Trainee

- Built an Excel and Tableau decision framework integrating multi-source energy, infrastructure, and cost data to evaluate 5 candidate locations for an Intel data-center project across grid reliability, power economics, energy mix, and infrastructure readiness.
- Analyzed Recording Academy campaign data to identify 3 engagement drop-off points and the highest-performing audience segments, converting the findings into reports and presentations that informed final recommendations.
- Automated recurring data-cleaning, reporting, and documentation workflows in Python, reducing manual processing and speeding up analysis.

DLF LIMITED | Gurugram, India

Aug 2023 - Nov 2023

Finance & Accounting Intern

- Standardized monthly financial reporting and expense classification across 7+ vendors using Excel and Ramco, reducing duplicate entries, manual reconciliation, and inconsistencies across finance and accounting reporting.
- Reconciled and analyzed 3 months of vendor and departmental spending, isolating recurring cost drivers and variance patterns that informed a cost review credited with approximately 10% lower monthly operating costs.

NTALENTS.AI | Bangalore, India

Jun 2023 - Jul 2023

Data Analyst Intern

- Queried, cleaned, and analyzed tens of thousands of recruitment records per client across 3+ accounts using SQL and Python, building dashboards that identified hiring bottlenecks, funnel trends, and operational performance patterns.
- Synthesized client-level analysis into presentations and recommendations for account teams, contributing to an approximately 15% improvement in reported client-satisfaction scores.

MARQUEE EQUITY | New Delhi, India

Jul 2022 - Jun 2023

Investment Research Fellow

- Researched 5+ early- and growth-stage companies across TMT, consumer, education, and B2B services, assessing business models, funding activity, sector dynamics, market positioning, and competitive landscapes for fundraising mandates.
- Produced company profiles, sector briefs, competitive analyses, and investor materials used to evaluate opportunities, prioritize fundraising mandates, and support investor outreach.
- Synthesized company and market research into client materials covering growth drivers, competitive positioning, key risks, and fundraising opportunities.

SELECTED PROJECTS

UBI LABOR-SUPPLY ANALYSIS | Python · Econometrics · Sensitivity Analysis

Jan 2025 - Jun 2025

- Built and stress-tested a Python labor-supply model across annual UBI levels of \$0-\$18,000 and income-elasticity assumptions of 0.05-0.20; a \$12,000 UBI at 0.10 elasticity implied a 2.4% modeled decline in work hours, quantifying how behavioral assumptions alter the estimated policy effect.

DIGITAL BANKING & FINANCIAL INCLUSION | Mixed-Methods Financial Analysis

Sep 2024 - Dec 2024

- Analyzed survey responses from 300 rural Indiana residents alongside banking-professional interviews and Federal Reserve and Indiana DFI research, identifying internet access and digital literacy as key constraints on digital-banking adoption while assessing mobile banking's effect on financial access and engagement.
